INDOOR OBSTACLE COURSE

Up to 200 persons

Segway outdoor events are conducted nationwide, together with you and are an attractive addition to your proposed program. Enthrall the guests at your function with a Segway Obstacle Course and acquaint yourself with Segway driving in a way that best suits you. Ideal as a relaxing and pleasurable break between seminars, as an addition to your function or as an attraction at events.

Our guides show you how the Segway functions and the variety of activities on the obstacles course. The guides accompany you through the course and are always available for questions. They ensure safe completion of the activities and continually impart a good sense of humor to the guests.

Due to the emission free electric engine, the Segway is ideally suited for use in indoor areas. Its operation is fitted for parquet or carpeted floors such as indoor exhibition centers, restaurant areas, hotels or conference rooms. The space requirement per obstacle course is a minimum of 15m x 20m.

Groups of up to 60 persons can participate in a team contest through different obstacle courses and the winner will receive a prize at the end of the competition. (see Skills Obstacle Course)
We guide indoor events for groups from ten to hundreds of participants and can combine these with additional elements and fringe support programs. We are happy to issue an individual offer for your desired Segway course.
