Adelboden

CLASSIC TOUR
«SILLERENBÜHL»

Our guides will show you their destination - Join us on an unforgettable and interesting tour through Adelboden and the surrounding area with the innovative Segway. We cover part of the route in the middle of the Bernese Mountains on natural roads in the countryside and part on paved roads.This exciting combination makes the tour an unforgettable experience for all nature lovers.

The Segway tour starts on the village street in the middle of Adelboden and takes us straight up on a steep incline. We cross the Stiegelbach and pass the Schermtanne restaurant. While the Segway effortlessly manages the incline, you can immerse yourself in the mountain panorama all around.

We descend again through wooded areas and cross the Rossbach before tackling the almost 500-metre climb to the Sillerenbühl cable car. We conquer the ridge at 1'974 m.a.s.l. and enjoy a sweeping view of peaks such as Albristhorn, Lohner, Wildstrubel and Wildhorn while we make the descent towards the Adelboden-Geils valley station. We are in the heart of the Adelboden ski area, but there is also a lot to do here in summer. On the way we meet many hikers as well as scooters in this popular Bernese Oberland holiday resort.

Following the lift line towards Adelboden we enjoy the alternation between wooded stretches and open fields. Passing charming wooden houses and cows in their summer meadow, we enjoy the last few metres on the Segway on paved roads. After a short ride past the Vitaparcours, we cross the village centre and arrive back at our starting point, where the tour ends after 2.5 hours.

2.5 hours | from 120 CHF
