

Airport

CLASSIC TOUR «ALL ABOUT AVIATION»

Join us on the varied tour around Zurich Airport and listen to exciting information about aviation and nature. After about 30 minutes of introduction, we we drive from our starting point in Kloten towards the airport.

The route leads us past EXECUJET and the REGA headquarters to the slopes. During the drive along runway 14 we see landing planes as well as the tower and dock E. At the end of the runway we take a short break and watch the huge vehicle of transport landing.

We pass the Meteo Observer of Meteo Switzerland and drive through the forest. This area includes a large nature reserve, which has been renatured by Zurich Airport. The route leads us along the Glatt to the Heli-Grill. From the viewing platform at the snack bar you have a good overview of the whole airport and starting planes.

Passing the stands for business planes, the headquarters of Flughafen Zürich AG and the airport prison, we reach the event Restaurant Runway 34. We continue towards the big bus station and behind it the CIRCLE are one of our last stops. We admire what used to be the largest building construction site in Switzerland, before we continue back to the Lagerhaus Areal in Kloten where our tour ends.

WHAT AWAITS YOU:

- Airport head with view of the Circle
- Headquarters of REGA
- Drive along the piste
- Landing Aircraft
- Conservation area
- Heli-Grill with viewing platform
- Overview of the airport
